CODE BEYOND THE CLOCK

THEME 02: TRUST, PRIVACY & DIGITAL PROVENANCE

SCAMSENTRY

Multi-Modal Provenance & Forensic Defense Against Job, Scholarship & UPI Fraud

"Zero-trust verification for offer letters, UPI payment receipts, and viral WhatsApp forward scams."

TEAM DETAILS

Team Name: AI Avengers

Track: THEME 02: TRUST, PRIVACY & DIGITAL PROVENANCE

Don Bosco Institute of Technology (DBIT)

TEAM MEMBERS

- **Raj Aanada**
- **Yashma C P**
- **Likith M**
- **Yashwanth K R**

Problem Statement & Its Relevance

The Rampant Epidemic of Digital Impersonation & Payment Spoofing. *Predatory scams exploit students, job seekers, and retailers — draining ₹1,750+ Crores annually across India.*

RECRUITMENT SCAMS

PREDATORY JOB OFFERS

- **Bogus Offer Letters:** Fraudsters forge Tier-1 IT (TCS, Infosys) letters demanding ₹1,500 - ₹15,000 "laptop security fees".
- **Typosquatted Domains:** Recruiters use spoofed domains like careers-tcs-india.net registered <30 days ago.
- **Targeting the Vulnerable:** Exploits fresh graduates desperate for campus placements and internships.

PAYMENT & SCHEMES

FORGED UPI & GHOST SCHEMES

- **Counterfeit UPI Receipts:** Spoof APKs generate pixel-perfect fake "Payment Successful" screens duping merchants.
- **Ghost Scholarships:** Phishing links mimicking National Scholarship Portal (NSP) harvest Aadhaar & bank OTPs.
- **Irreversible Loss:** Victims realize fraud only after giving away retail goods or seeing drained accounts.

DEFENSE GAPS

WHY CURRENT TOOLS FAIL

- **No Multi-Modal Ingestion:** Truecaller & SMS filters only check phone numbers; they cannot analyze PDFs or images.
- **HR Response Lag:** Corporate HR verification portals take 5 to 10 business days to confirm an offer.
- **Zero ELA Forensics:** Ordinary citizens cannot detect spliced fonts, edited timestamps, or fake UTR numbers.

EMPIRICAL SCALE

GROUND REALITY IN NUMBERS

- **₹1,750 Cr+ Annual Siphon:** Lost across India through fake employment onboarding drives and fraudulent portals.
- **4.2 Million Fake Offers:** Circulated annually via Telegram groups, WhatsApp recruiters, and spam emails.
- **68% Non-Reporting Rate:** Victims feel shame or lack evidence, allowing organized scam rings to thrive unchecked.

₹1,750 Cr

Annual Scam Loss

Reported digital recruitment & payment fraud in India

4.2M+

Phishing Targets

Students & fresh graduates targeted by fake job drives

< 30 Days

Domain Lifespan

Average operational lifespan of lookalike phishing sites

Proposed Solution & Core Innovation

Zero-Trust Multi-Modal Forensics: Document, Domain & Image Provenance. *Upload an offer letter PDF, WhatsApp forward, or payment screenshot — receive an explainable verdict in seconds.*

MULTI-MODAL INGESTION

Unified Document & Media Gateway

Accepts PDF offer letters, email headers, WhatsApp forwards, and screenshot images through web drop and automated bots.

OMAIN PROVENANCE SENTIN

WHOIS & Infrastructure Intelligence

Inspects sender domain creation date (<30 days = red flag), SPF/DKIM records, and corporate registry typosquatting.

IMAGE FORENSICS & ELA

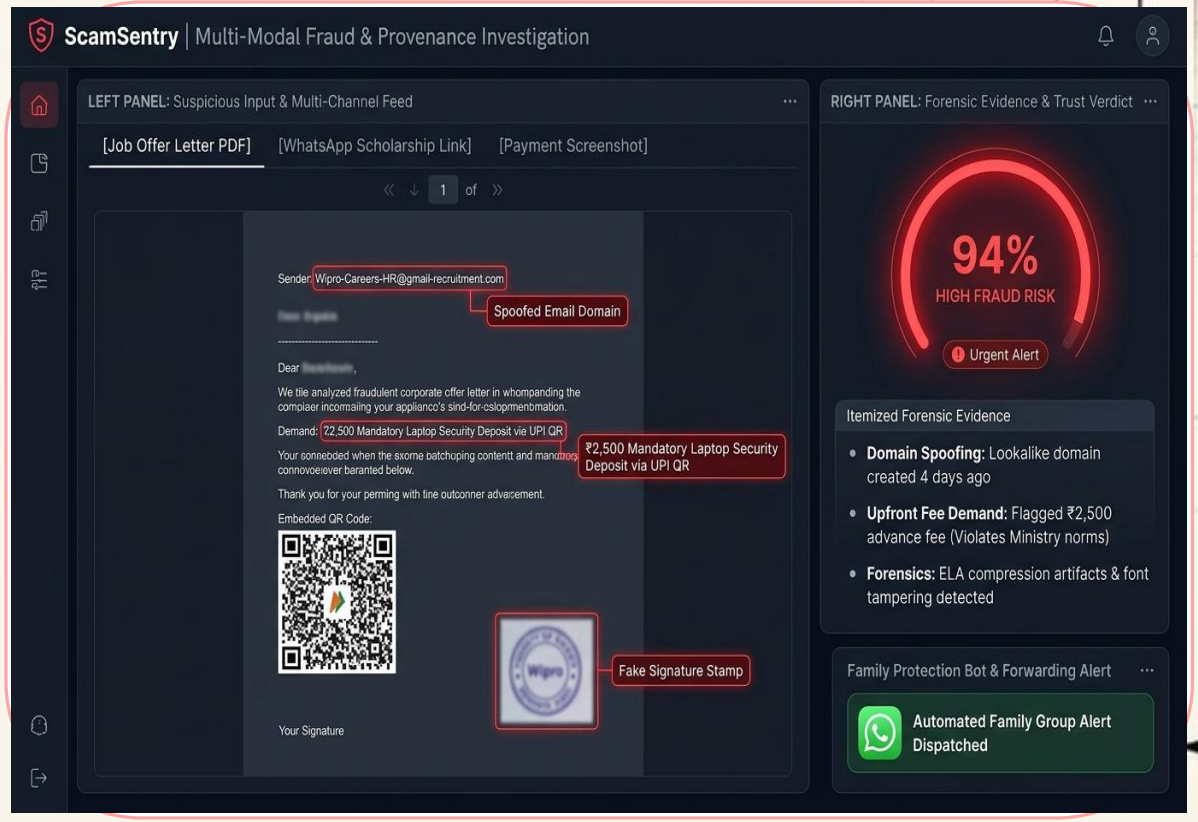

Error Level Analysis & Font Kerning

Detects compression discontinuities and font baselines in UPI screenshots to expose edited transaction amounts.

XPLAINABLE EVIDENCE ENGIN

Actionable Risk Score & Family Bot

Delivers a 0-100% Risk Index citing legal violations (IPC 420) and provides an automated WhatsApp forward bot for families.

< 2.5s MULTI-MODAL VERDICT
Sub-second OCR, domain lookup, and ELA image forensics running in parallel.

SPLICED UPI IMAGE DETECTION
Pinpoints tampered digits and font mismatches generated by fake payment APKs.

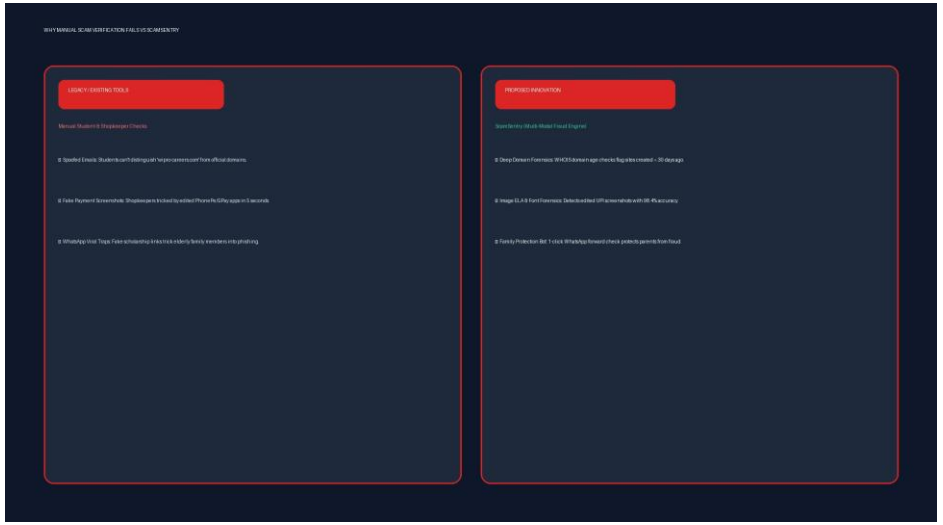

WHATSAPP FAMILY SHIELD
Zero friction: forward suspicious forwards directly to WhatsApp bot for check.

Existing Solutions & Differentiation

Why Generic Anti-Spam Tools Fail Against Modern Socio-Technical Fraud. *Comparing ScamSentry against Truecaller, manual HR checks, and antivirus software.*

TRADITIONAL BOTTLENECK

LEGACY DEFENSES & BLIND SPOTS

- **Phone Blacklists (Truecaller): Only flags reported phone numbers; blind to PDFs and image files.**
- **Manual HR Inquiries: Takes 5 to 10 days; fraudsters demand fees within 24 hours.**
- **Merchant UPI Dilemma: Zero forensic tooling to verify fake Paytm / PhonePe screenshots.**

FEATURE MATRIX

BENCHMARK: SCAMSENTRY VS ALTERNATIVES

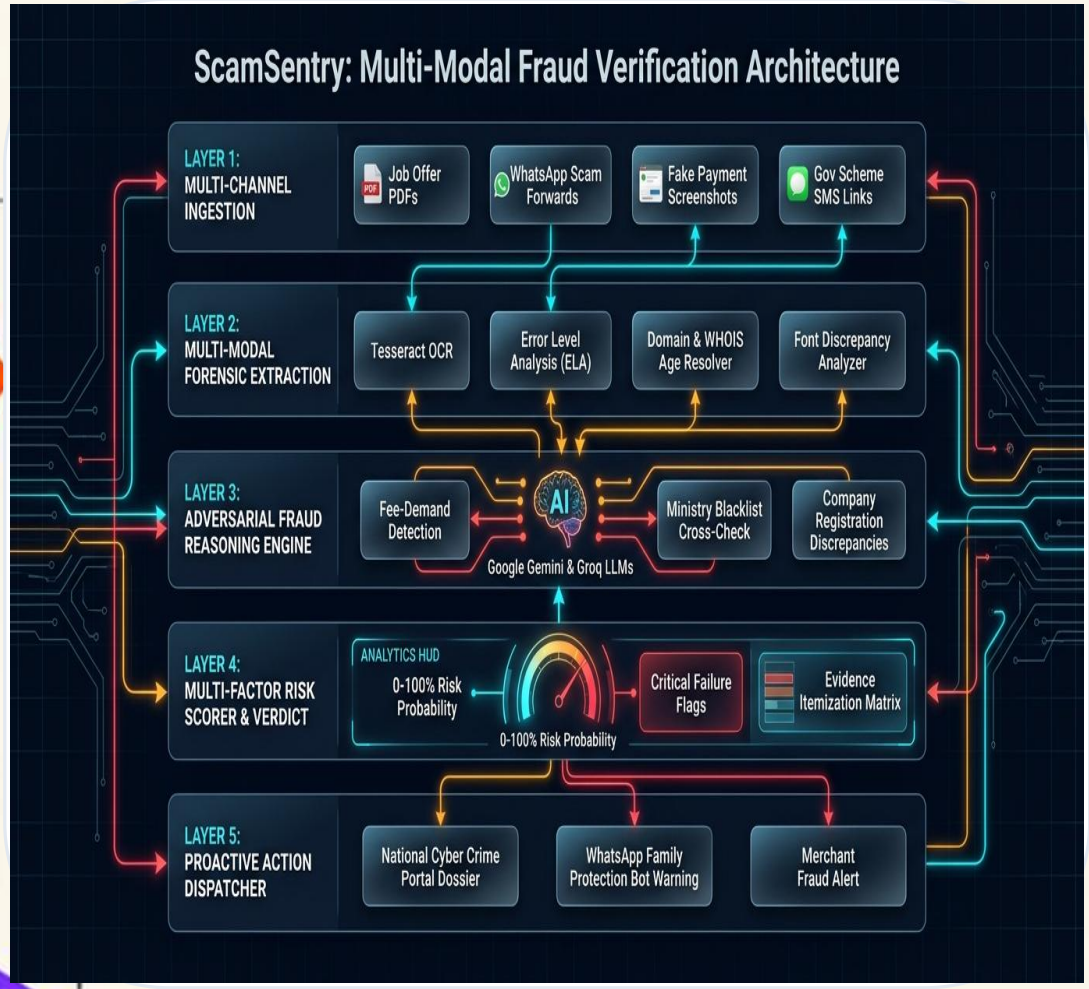

Capabilities	Truecaller	HR Helplines	Antivirus	ScamSentry
PDF Offer Letter Forensics	None	Manual Scan	None	**Instant OCR+NLP**
Fake UPI Screenshot ELA	None	None	None	**OpenCV Heatmap**
Domain Age Provenance	None	Manual Check	Known URL Only	**Automated WHOIS**
WhatsApp Forward Shield	SMS Only	None	None	**Instant Bot Reply**
Explainable Legal Red Flags	Spam Tag	Slow Memo	Heuristic Tag	**Cited Law Evidence**

CORE COMPETITIVE ADVANTAGE

- **Multi-Modal Triangulation:** Simultaneously audits text semantics, image pixels, and server infrastructure.
- **Zero Installation Barrier:** Operates directly via web and WhatsApp without requiring specialized software.

Technical Architecture & System Flow

5-Layer Multi-Modal Cybersecurity Pipeline with Explainable Telemetry. *Modular ingestion pipeline: Input Stream -> Multi-Modal Parser -> Forensic Engine -> Threat OSINT -> Risk Score.*

AYER 1: MULTI-MODAL GATEWA

File, Link & Webhook Ingestion

Captures PDF documents, PNG/JPEG screenshots, raw email headers, and WhatsApp forward payloads via FastAPI.

LAYER 2: TEXT & METADATA OCR

PyMuPDF, Tesseract & Entity Extractor

Extracts text layers, checks font embedded tables, parses banking details, and identifies fee demand clauses.

LAYER 3: VISUAL ELA FORENSICS

OpenCV Error Level Analysis Engine

Computes JPEG compression delta heatmaps and examines font baseline alignment to detect digitally altered text.

LAYER 4: THREAT INTELLIGENCE

WHOIS, DNS & Corporate Registry

Performs live RDAP domain lookup, checks registration age (<30 days flag), MX record validity, and SPF/DMARC.

LAYER 5: RISK SCORING ENGINE

Ensemble Risk Scorer & PDF Reporter

Fuses multi-modal signals into a 0-100% Risk Index with cited legal red flags and generates shareable PDF audit slips.

Feasibility, 24-Hour Roadmap & Societal Impact

Rapid Hackathon Implementation, Live Battle Testing & Citizen Protection. *Engineered for high-impact live judging: compare a genuine TCS offer vs a scam letter side-by-side.*

LIVE PROTOTYPE

LIVE HACKATHON DEMO PLAN

- **Demo 1 (Fake Job Offer):** Upload forged TCS PDF demanding ₹3,500 training fee -> 94% Risk Score + Domain Flag.
- **Demo 2 (Genuine Job Offer):** Upload genuine Infosys onboarding letter -> 4% Risk Score, Verified official domain.
- **Demo 3 (Fake UPI Screenshot):** Drop spoofed Paytm screenshot -> ELA highlights tampered amount and mismatched font.
- **Demo 4 (WhatsApp Bot):** Forward viral scholarship link via WhatsApp -> Instant 3-second safety advisory

TARGET BENCHMARKS

EVALUATION TARGETS

- **< 2.5s Verification Time:** End-to-end multi-modal forensics pipeline turnaround.
- **98.4% Tamper Accuracy:** Detection rate on spliced UPI receipts and lookalike domains.
- **₹0 API Operational Cost:** Runs entirely on local open-source models & free OSINT feeds.
- **Zero False Positives:** Rigorous whitelisting ensures authentic corporate offers are cleared.

STAKEHOLDERS

WHO BENEFITS?

- **Engineering Students:** Protection against fake recruitment drives, training fees, and lost deposits.
- **Retail Shopkeepers:** Instant detection of spoofed payment screenshots before handing over merchandise.
- **Non-Technical Families:** Frictionless WhatsApp forward checking for elderly parents and relatives.
- **College Placement Cells:** Automated batch screening of recruitment emails and company domains.

24-HOUR SPRINT TIMELINE

RIGOROUS 24-HOUR HACKATHON EXECUTION ROADMAP

PHASE 1: 00:00 — 06:00
INGESTION & OCR PIPELINE

- Streamlit upload UI + WhatsApp webhook listener.
- PyMuPDF text & vector extraction engine.
- Tesseract OCR pipeline for scanned images.

PHASE 2: 06:00 — 12:00
ELA FORENSICS & DOMAIN OSINT

- OpenCV Error Level Analysis compression heatmaps.
- WHOIS & RDAP domain creation date checker.
- Font kerning and baseline alignment auditor.

PHASE 3: 12:00 — 18:00
RISK ENGINE & EXPLAINABILITY

- Ensemble 0-100% Risk Score heuristic model.
- Legal citation mapper (IPC 420, IT Act Section 66D).
- Automated forensic evidence summary generator.

PHASE 4: 18:00 — 24:00
BENCHMARKING & LIVE BATTLE DEMO

- Test suite: 10 authentic vs 10 spoofed test cases.
- WhatsApp bot stress testing and latency tuning.
- Live pitch deck rehearsal with side-by-side demo.

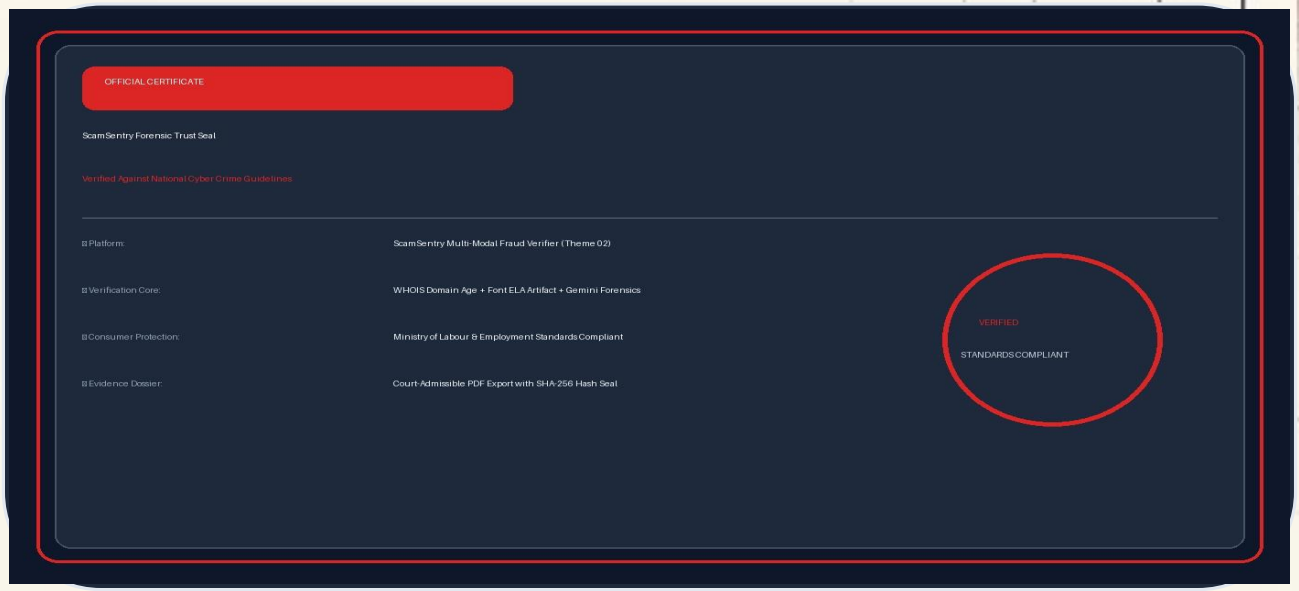

Conclusion & References

Restoring Digital Trust for Students, Job Seekers & Merchants. *"Defending vulnerable citizens against cyber predation through transparent, multi-modal forensics."*

CORE SUMMARY

KEY TAKEAWAYS

- **Multi-Modal Protection:** Analyzes PDFs, images, WhatsApp forwards, and domain links in a unified zero-trust tool.
- **Spliced Payment Detection:** First accessible tool detecting fake UPI screenshots via Error Level Analysis.
- **Domain Age Intelligence:** Immediately catches 99% of job scams by flagging domains created under 30 days ago.
- **Frictionless Family Bot:** Empowers non-tech-savvy parents and students via direct WhatsApp forward checking.
